

I want you to know that I oppose HR 4026. I wish that you would not support this bill that will regulate Satellite Radio's weather and traffic reports. I have to travel for my diocese and Xm radio is the only way I can get accurate travel and weather information. Please don't let the Washington special interest once again to take advantage of the little guy. Its time that special interest became the american voter and not big special interest groups.. Thanks for you consideration
